

MEMORANDUM

To: Transportation Committee

Date: November 14, 2008

From: CMAP Staff

Re: TIP revisions

Due to the number of TIP revisions requested, a summary memo has been developed. There are 1,203 TIP revisions being requested. The many changes are due to two things:

- All line items that were in Federal Fiscal Year (FFY) 2008 had to be awarded, deleted, or moved. This is done not only because it is the end of the year but also so we can update the TIP to include the next Federal Fiscal Year.
- TIP changes that occur on a regular basis within individual programs which include adding new exempt projects, moving programming years as needed, correcting location information, etc.

All programming agencies submitted changes and were requested to verify that the correct change was made. The following chart shows the types of changes that are occurring; these changes are included in the four reports highlighted below.

Change Project	16
Delete Project	37
Change Line Item	749
Award Project	254
New Project	147
